

Autodesk® ProductStream™ RapidSetup Program

Our RapidSetup implementation plans involve four major steps:

- Evaluating your Business.
- Planning the Implementation.
- Forming a Project Team.
- Executing the Implementation Plan.

Autodesk® ProductStream™ RapidSetup Checklist (1 - 5 Users)

The typical Autodesk ProductStream™ RapidSetup implementation plan involves these nine steps.

1. Install software on the designated server
2. Install software on client machines
3. Define and create users/groups and assign appropriate roles
4. Define and create the folder structure
5. Setup the user Workspace
6. Import company data
 - a. Library files
 - b. Project files
7. Property Customization
8. Setup custom views and saved searches
9. Engineering Change Order (ECO) setup
10. Item properties
11. Lifecycles setup
12. Getting you started Autodesk® Vault and ProductStream™ training.

To successfully implement Autodesk® ProductStream™, network access is required.
