

Autodesk® Vault RapidSetup Program

Our RapidSetup implementation plans involve four major steps:

- Evaluating your Business.
- Planning the Implementation.
- Forming a Project Team.
- Executing the Implementation Plan.

Autodesk® Vault RapidSetup Checklist (1 - 5 Users)

The typical Autodesk Vault RapidSetup implementation plan involves these nine steps.

1. Install software on the designated server
2. Install software on client machines
3. Define and create users/groups and assign appropriate roles
4. Define and create the folder structure
5. Setup the user Workspace
6. Import company data
 - a. Library files
 - b. Project files
7. Property Customization
8. Setup custom views and saved searches
9. Getting you started Autodesk® Vault training

The Autodesk® Vault RapidSetup program usually requires 4-6 days of consulting time from Applied Engineering Technology's certified experts.

*Due to unpredictable issues, the Autodesk Vault RapidSetup may require additional consulting time. Also, to successfully implement Autodesk® Vault, network access is required.
